

Replace Abstract of the Disclosure Section from Page 29 lines 1-7, inclusive, with the following:

**Abstract of the Disclosure**

-- When a user retrieves a web page from a network and it is determined that the web page can be accessed from the network with a resource location request including a Uniform Resource Identifier (URI) having one or more URI components, one or more domain names can be generated from at least one of a one or more URI components and at least a portion of the web page, and the user can be provided a copy of the web page from the network along with the ability to determine whether at least one domain name of said one or more domain names is available for registration.--
